

ENVIRONMENTAL POLICY

Martin-Baker Aircraft Company Ltd is the world's most experienced, longest established manufacturer of Ejection Seat Systems and to date, our products have saved in excess of 7500 lives.

As a manufacturer, our activities can have adverse impacts on the environment and Martin-Baker regards care of the environment as a key responsibility that it continues to discharge through its Environmental Management Systems (EMS) which were first audited in 1999 and are still independently audited and verified as meeting the full requirements of the BSI: ISO14001 standard for environmental management.

Through our EMS we commit to:

- ▼ Being aware of, and compliant with, all relevant environmental compliance obligations applicable to our significant environmental obligations;
- ▼ Providing human, financial and other resource; and training of staff, to maintain the EMS;
- ▼ Establishing environmental objectives as part of our commitment to continual improvement;
- ▼ Protecting the environment including monitoring and managing waste streams and keeping wastage to a minimum as far as is practicable;
- ▼ Preventing pollution by effective control of our significant environmental initiatives.
